Peter Barci

Software Engineer (Java) · Test Automation

barci.peter@gmail.com · linkedin.com/in/peter-barci-19a66b65 · pelkosom.github.io · Bratislava, Slovakia

PROFILE

Software engineer specialising in Java / Spring Boot development and test automation, with experience across banking, telco, gaming, energy, industry and food delivery. I work in agile teams and deliver high-quality solutions from requirements analysis to deployment on AWS. Currently I develop the backend of the InSight Platform for Solar Turbines (Caterpillar). Before that, at PowereX Energy I built systems for AI-driven green energy trading and smart battery management; at Moxymind I built test automation frameworks from scratch and led frontend and backend automation testing.

WORK EXPERIENCE

Software Engineer (Java)

12/2024 – present

Moxymind · Solar Turbines (Solar Digital)

InSight Platform – digital solutions for lifecycle management of industrial turbines (Caterpillar group)

- Requirements analysis, design, development and testing of features and whole applications for a large-scale enterprise platform
- Backend on Java 21 and Spring Boot 3 with REST APIs (Swagger), Redis, PostgreSQL and Oracle
- Technical problem solving, maintaining and fixing the existing code base, peer reviews
- Working with software and test engineers, designers and data scientists in an agile team

Tech: Java 21, Spring Boot 3, REST, Swagger, Redis, PostgreSQL, Oracle, Docker, Jenkins, Azure DevOps, AWS, Sonar

Software Developer

09/2022 – 11/2024

PowereX Energy · Bratislava

AI-driven green energy trading, smart battery management and monitoring system

- Requirements analysis and software design to high quality standards in agile development
- Feature development covered by unit and integration tests in a robust, scalable microservice architecture
- Resolving operational incidents, monitoring and ensuring system stability
- Deploying and maintaining solutions on AWS infrastructure

Tech: Java, Spring Boot, PostgreSQL, Gradle, Kafka, MQTT, Docker, AWS, GitHub, Grafana, ELK, Prometheus

Senior Test Automation Developer & Consultant

04/2021 – 08/2022

Moxymind · Telco project

Mobile test automation framework from scratch for a complex telco solution

- Design and implementation of a greenfield mobile test automation framework
- Design and implementation of backend test automation
- Continuous Testing set up in Jenkins CI

Tech: Java, Appium, Android, iOS, BrowserStack, REST, Serenity, Jenkins, Docker

Senior Test Automation Developer & Consultant

10/2020 – 05/2021

Moxymind · Food delivery project

Test automation framework from scratch for a complex food delivery platform

- Designed and built the frontend framework and scripts, plus backend automation (REST)
- Led 2 team members focused on functional and non-functional testing
- POC of a mobile automation framework (Appium, Android, iOS, BrowserStack)
- Health and performance monitoring of third-party integrations (jMeter, Taurus, BlazeMeter)

Tech: Java, JavaScript, Cypress, Selenium, RestAssured, JUnit, TestRail, WireMock, jMeter, Docker

Senior Test Automation Developer & Consultant
06/2019 – 07/2020

Moxymind · Banking project

Test automation and CI/CD from scratch for an international banking project (Temenos T24 integration)

- Design and implementation of frontend and backend tests
- Working with bank and vendor consultants in an agile environment

Tech: Java, Serenity, Selenium, Cypress, REST, SOAP, JMS, Kafka, GitLab, Jenkins

Software Test Automation Engineer
02/2018 – 06/2019

CIIT GmbH · Bratislava

- QA member of a Scrum team developing online games
- Test concepts, test cases, building and maintaining automation
- Continuous integration, system integration tests, regular customer meetings in Vienna

Tech: Java, JUnit4, Selenium Grid, Appium, SQL, Postman, Jenkins, Maven

Team Leader / Project Manager
07/2016 – 12/2017

Valicare GmbH · Trenčín

- Led the SCV (computerised system validation) team – planning, coordination and budget of Alarm & Function Testing projects for BOSCH pharmaceutical equipment
- Resource, budget and billing management, reporting to leadership; team development and motivation
- AFT per 21 CFR Part 11: PLC, HMI, SCADA, disaster recovery, software testing

Validation Engineer
10/2013 – 07/2016

Valicare GmbH

- Validation and qualification of aseptic filling equipment (BOSCH) at customer sites in Europe, Asia and the USA
- Independently authored and executed qualification documentation and tests; sensor calibration

Regional Sales Manager
summers 2012 & 2013

Global Prints Inc. · USA

- Sales and marketing support at universities across the Eastern and Midwest USA, running a small business independently

SKILLS

Backend	Java 21, Spring Boot 3, REST / Swagger, PostgreSQL, Oracle, Redis, Kafka, MQTT, Gradle, Maven
Cloud & DevOps	AWS, Docker, Jenkins, Azure DevOps, GitHub, GitLab, Bitbucket, Sonar
Observability	Grafana, Prometheus, ELK stack
Test Automation	Selenium WebDriver, Cypress, Serenity, Appium, REST Assured, JUnit, WireMock, Postman, TestRail, BrowserStack
Performance	jMeter, Taurus, BlazeMeter
Practices	Agile / Scrum, CI/CD, Continuous Testing, GMP, 21 CFR Part 11

EDUCATION

MSc, Industrial Electrical Engineering — Faculty of Electrical Engineering and Informatics, Technical University of Košice — 2008 – 2013

Audio and Video Technics — Secondary Technical School of Jozef Murgaš — 2004 – 2008
